

Dzianis Paryvai

Software Developer

👤 Profile

Versatile Software Developer with expertise in RPA automation, backend development, and system integration. Skilled in automating business processes using WorkFusion, maintaining and optimizing existing solutions, and developing backend services with Python and Ruby on Rails. Experienced in building Android applications (Java, Kotlin) and integrating CRM systems. Motivated by challenging tasks and always eager to deepen my technical expertise.

💼 Employment History

Software Developer at Supra, Minsk

September 2024 — Present

I support existing websites and develop new ones for various companies within the group. Additionally, I handle small-scale automation of routine tasks for my colleagues, improving overall efficiency and workflow.

RPA Developer at A1 Belarus

January 2021 — August 2024

My work initially focused on automating SOX controls as part of the team's priorities. Later, the focus shifted toward more practical operational processes. Over the past year, I took on additional responsibility for process maintenance—investigating errors, identifying vulnerabilities, and implementing fixes, ensuring smooth and continuous operations.

🎓 Education

Bachelor's degree, Belarusian State University

September 2017 — June 2021

🌟 Courses

Automation Engineer, AutomationAcademy.com

September 2024
